

Foreword

For decades Sri Ramani Guruji came to Europe every year. He was giving lectures and reading palm leaves for a lot of people. At the same time many people from Germany, Austria, and Switzerland regularly traveled to India for the celebration of Sri Kakkbhujanda Maharishi. From 2020 this close exchange with Sri Ramani has been limited because of the difficulties of the Corona time. Sri Ramani always emphasises that despite long distances, the relationship still remains. In his letters to the friends in Europe we can feel it!

In his letters, Sri Ramani asks us to be one with the presence of nature, the great power of Mother Earth, the power of creation. Honoring and protecting nature is the deep duty and wisdom for our future - especially in these times of climate change crisis. This is the truth!

Now an extraordinary precious treasure of letters has been published.

May these letters guide us to find the way back to nature, to our True Being and to become One with the Creation.

- Reinhard Machowinski (Balaji)
