

Preface

It makes me very much happy and also makes me proud to share the thoughts which come out from my inner soul. All these letters to my friends in Germany, Austria, and Swiss cannot be sent to each and everyone individually. So I send these letters through Rupa so that she can translate them and send them to all. Dear friends, you know very well that the climate condition is vastly changing and it is a danger for our life, and the life of the younger generation. So please take it seriously and make it good for all to have a better life in future. Do not spoil Mother Earth and make it polluted. Worship her, with full of faith and devotion. Teach the younger generation the faith and devotion towards God, and make them understand about Nature. One must speak with Nature, and be one with Nature. This is my wish and request to all of you so that these letters come to you. I always feel your love and compassion towards me. My dear friends from Germany, Austria and Switzerland, I will never forget the great hospitality and sincere love and affection you have showered on me that brings me a great inner strength and peace, and gives me a strong feeling to do more and more good things. For this my salutation, with full of love, to all of you.

Thank you

Narbhavi
