Oh my most beloved Mother Earth!

My salutations to you, for your kindness, tolerance, and for giving gifts to every living creature. Even though we do harm, you forget, and your forgiveness is abundant; Nothing is comparable. Today, I went to my garden house early in the morning. The weather was a little chilly, and I felt it as a blessing of nature. Before I entered my farm house, my next farmhouse neighbour came near to me and said, “Aunty, please come and see my garden, and bless my work which I have done with the help of nature”.

It was a great surprise that I, without hesitation, entered his farmhouse. Oh! What a wonderful green field! Seeing such a variety of plants, my inner soul said, “This is a paradise!”. It was a wonderful farm with different vegetables, with multi-coloured things, and this really made me happy. On my left side I saw one full row of capsicum plants. What a wonder! In all these plants I saw green, red and yellow capsicums. In

each and every plant. I asked him, “How is it possible?”. The young farmer said, “I did grafting for some time, but I was not able to see much growth. I became sad, as on the other side the normal capsicum plants started to bear fruit, although only green capsicums. It is by the grace of Nature, that in time, grafted plants bore such wonderful fruits and even better, for longer than the other side.” He continued, “I learnt this kind of agricultural farming through my grandfather. I saw great success in it, and now I have become a consultant and am helping so many people to farm.

Your garden house sand is full of energy, strength, and fertile. Give me a chance, I will plant and help you. It is not for money. I have seen you very often here, your smiling face, gentleness, and moving with each and everyone with full compassion. That made me give this request to you.” We human beings, living in this worldly life, we never think about others, their welfare or prosperity, and we never want to share even the smallest of their problems. That is very much lacking in our human society. Mother Nature gives water, air, and all kinds of benefits to us without expecting anything from us. My dear friends, we must think for a moment, “Why don’t we take care of others? At least in a small way or otherwise thinking about them and praying to Mother Mary to give them peace, comfort and happiness”.

Our European country always stood at the top to do good things for others. Because of that only, our forefathers said the following:

*“Say good, Do good, and Alles’ Good”*

Danke my dear friends, I am talking to you through this letter to Wargalla (Rupa) so that she can communicate to all. Nature is going to make wonderful things in the coming period. I want to say European countries are again going to get full of peace, prosperity and happiness. Dear friends, be strong mentally, think positively, work hard, and do good. All divine energy will come to you. One thing I promise you Mother Mary is protecting all. The angels are coming and supporting all your efforts.

Thank you!

Ramani Guruji

My Dear Friends from Germany, Austria, and Switzerland,

My sincere prayers for all of you. I am sure the mother will shower her blessings on all of you. All the present hurdles, problems, inner sufferings, and misunderstandings will vanish. When the Sun God comes, the ice dews vanish. That is the lesson Nature tells us. Always feel, enjoy the experience while you do service to others will give much more inner happiness. Again the great maharishi Kaka Bhujanda gives his blessings to all of you.

Thank you!  
Guruji
