

NARBHAVI

8th July, 2021

My most beloved friends from Germany, Austria, and Switzerland,

Being a Thursday, it is Guru's day. I want to assure you that there are a lot of good things, not only financially, but also in our family, where you will find good harmony and peace.

My main objective of this letter is regarding the environmental change in the universe. Some of the places it affects badly. On the Northern side of the Alps, a big thunderstorm, hail winds will give trouble.

In order to minimise the impact of environmental change within our control, each and every individual should strictly follow the instructions to avoid throwing away waste things, and also keeping public places neat and tidy. I want to tell you clearly that in September, and October, not only the weather, the force of wind, etc will be favourable for us. In this worldly situation, so many countries will be affected by this environmental change. Give some peace and happiness,

but after some time, we have to face thunderstorms or may be heavy rains or dust storms with heavy winds, etc. The other part of the world, a lot of unwanted natural disasters will happen. Melting of snow on both the poles will affect some parts with sea water rising higher. One has to be a little cautious.

Dear friends, Kaka Bhunjanda maharishi says he will protect all our friends, and also make good people come closer and closer to help you all. One thing that Bhunjanda especially says again and again is that of a positive outlook, positive thinking will bring not only success, but also will bring inner peace and harmony. He insists on you taking responsibility and doing your work. The reward will come by the grace of the Almighty. I want to tell you, my friends, that even if you are at home, plant some vegetables or green leaves in a small lawn or garden, or even in pots. Not only does this give a nice look, but it also gives good benefits for our own good.

Whatever I want to say, again and again in my thoughts it comes about Nature. Now I understand and admire nature; what a wonderful name. Why because it is a connected part and parcel of each one of our souls. Even though you have got hard work, come out for 5 mins to an open place, breathe, look at the sky, and enjoy the surroundings, then

you will get more energy to work further. Nature is having a hidden treasure, not only as gold and metals, but also as a great energy. This is why we call Mother Earth as the Mother of Energy, and the Master of Energy. Please think for a moment, what a wonderful world this is, and at the same time how nature protected us from all the evils. We think we are carrying the evils on our shoulders, but that is not correct. All the evils will be removed by nature itself. What can one do to live with nature forever? The only answer is to be active, smile, and join in with each and everyone with complete harmony. There you can find bliss. My dear friends, the bliss and enlightenment are not somewhere else. They are within you. You have to bring it out with your love, affection, attachment, and compassion. Smile, it is a gift to you by the Almighty. If you smile, Mother Mary will not only bless you, but give you strength, and hug you with full compassion. The relationship between Mother Mary and yourself is incomparable. It is called surrender (Faith), and oneness. You expect love, compassion, harmony. You also understand that others also expect the same. With a positive approach, be with friends, relatives and others. Harmony can be established only with devotion and determination. Our moods, ideas may change but love, attachment, and affinity never change.

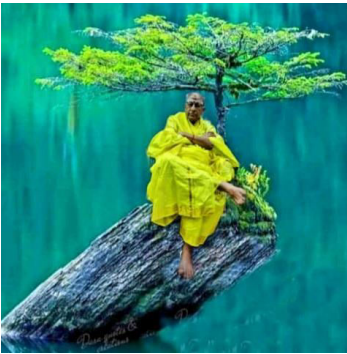

Finally, I want to tell the youngsters, “You have a wonderful period ahead, stand with full of faith, and devotion. Put your foot on the earth with a strong mind. Don’t get emotional. Don’t be like a volcano. Calm down. Make your heart like a lotus flower. You can deliver the love with your springing eyes, that makes everybody happy. The past experience in Europe and other countries, brings unwanted fear. It is like the erosion of a volcano. Because of that our personal life spoils.”

My dear youngsters, realise that the world is large, and that our soul is capable of adjusting, accepting, accommodating all good and bad things. But one thing you must understand - love is eternal. It is that klung (sound) of sweet and harmony always ringing in your ears. Be cheerful. Be honest and have absolute faith in Mother Mary and Mother Earth. Nature is our life. We must absolutely nourish it with full devotion and love, etc. You must try to go in the right path and establish a good, peaceful, happy, harmonious life. We have to live for our society, for our children, for our neighbours, and apart from this, for our motherland. Oh my dear Mother Earth! Oh my divine Mother Mary! Give energy and strength and take care of all of my devotees, wherever they are. I surrender myself to the lotus feet of the divine mother for the welfare of my friends, devotees and all

of us. My thoughts are always with you and at the same time I am within you. During my past visits, I am with you, I stay with you, I eat with you, and enjoy the great love and affection of yours. I felt it is the great boon the Almighty has given to me. I am always faithful to all of you for your love and affection. By your strength I always get more energy. The energy comes out of our soul, it gives solace for all. It is not only for us, it is for all. Oh my dear Nature! Make me nature always.

Guruji

OM SHANTHI

Guruji within you and nature

Guruji with you and within you
