**Jai Guru Maharaj Ki Jai!**

My humble, sincere prayers to all of you on this wonderful Gurupoornima Day! The full moon will bring inner peace, and happiness and also it will unite the family with abundant compassion. At the same time, each and everyone will realise their responsibility for this wonderful life.

Dear friends, you know very well this life is a wonderful life because it is a gift to us by God. The divine Mother not only brought us to this worldly life, but she also brings all comforts, peace, and harmony to each and every soul. Her full wish is to enlighten every soul who has come to the earth. Dear friends, think for a moment and realise the gift of God, and put your efforts in order to achieve the goal in life. Achievement is nothing but to know yourself, and do good to all. Only for that the divine Mother gives you strength and life.

The Moon God! Look at the sky, how sweet it is, how cool it is, and seeing the full moon, the waves in the sea get more happy. The waves rise and show their happiness, devotion, and at the same it surrenders towards the moon. My dear friends, surrender is the most important goal to achieve in your life. Surrender kills ego. Ego disturbs all our peace, harmony, joy, etc, etc. The most important good news in this holy Gurupoornima, which is going to give the great inner strength to your soul and make you full of divine peace and harmony.

My dear friends, don't sleep, be active, and put your efforts towards good, and do good to every living being. Not only will you enjoy life, you will, at the same time, make so many people happy, peaceful, apart from that full of confidence to live with divine strength. The GURU always takes the responsibility of yours. It is your duty to surrender your wishes at his lotus feet. I want to bring a great divine secret to all of you. Whatever may be the obstacles, hurdles, problems, they will all get solved very soon.

The divine arrow (→) started to remove the fear, the obstacles and the disturbances. Today also I want to

assure you all, the negative thoughts from the younger generation disturbs the family's peace, harmony. They are not able to understand compassion. By the grace of Divine Mother, Mother Earth bringing new energy of strength to humankind made you understand the responsibility for the future. Your country is going to prosper because Mother is taking the country in her hand and nourishing it (Lady Leadership will be prominently established in this worldly scenario).

Mixing all colours with all the beauty of Nature, look in one angle in order to enjoy the peace, the happiness. The mixture of colours, mixture of ideas, associations is the great strength for a Nation. Nation is more important. If the nation gets glory in this world, it is proud for each and every citizen of the land. How great the land is! How fertile! The volcano sand, how it gives glorious products. It helps humankind. My dear friends, you might have seen some holy places. The natural spring comes out, people take the water to drink. You test it. No need to test it because it is purest. How did it happen? That is the nature of the Mother. That is the nature of Mother Earth. My dear friends, take it in this holy day, Mother Earth is ultimate. None is equal because '*Ales wonderful!*'

The beauty, the wonder, the personification of love with purity of your action all makes wonderful divine energy in your soul. You must hear a klung (a sound). All the corners bring the blessings of the Almighty. I have told you so many times, Mother is ultimate, and matter is more important in your daily work. If you work with interest, you will be able to see the intensity of its energy. Energy's source is in your inner soul. You are like a waterfall (Niagara). It must come systematically, full of rigor and strength and at the same time it makes everyone enjoy the beauty of the waterfalls.

What can I do sitting far away from you? But in my mind, I am not far away. I am within you. I feel it, and I enjoy it! Today in my mind, I walked through Plantan Alle Strasse enjoying the garden of paradise. Then I went to our Gurupoornima fire ceremony place at Arthi house. The wonderful peacock called me thrice and started to dance with its feathers unfolded. Dear friends, it is wonderful to see all our friends not only happy, they feel they are gifted. This is the gift from the Divine Mother. Now again, come to the conclusion the divine Mother is with us and within us. Finally, I conclude my GuruPoornima with prayers, prosperity, harmony, and comfort to all of you, and at the same time, I pray that

everyone comes closer and closer with compassion. Please pray to Mother Mary.

Hallelujah! Hallelujah!! Hallelujah!!!
