

NARBHAVI

7th November, 2021

I feel it is the divine wish to call you and all our friends and devotees to share my small words which come out from my inner soul. I never thought before to share these words because it comes without my thinking from the mind. It is from my soul. Our ultimate aim is to establish the purpose of life, to understand and accept the greatness of "1+1 (Narbhavi)".

I send these letters through Rupa because she will translate them to the German language and send them to all my lovable friends from Germany, Austria, and Switzerland.

When she translates, I am able to see that the BEAUTY OF THE WORDS that come out from her will bring harmony, and peace because Bunjanda says she will do good service to all by her previous karma and good incarnations. While translating my speeches I always feel she moves with words

and her inner joy brings a great compassion to all who listen to it. That makes me happy. I am proud of her!

Dear friends, our ultimate move and aim must come closer and closer and share our good things and thoughts to each and everyone. It is my humble request.

The Reality

The first sound (Klung) received by Mother Earth is liebe (love). It came with bright divine light from the sky. That light is nothing but a divine message and strength. Because of this great light, Mother Earth wanted to get more and more energy from the Sun God for the sake of all the creatures living on this Earth. It is the theory that Mother Earth is going around the Sun God because Mother Earth receives plenty of divine energy to support us and all other living creatures. What a wonderful grace of Mother Earth. My dear friends, is it not our duty to praise and say "Danke! Danke!" to Mother Earth?

If you want to experience the divine light from the sky to the Earth, go to Kevelaer and stay in the vicinity of Mother Mary's Church. In the middle of the night, one can see rays of blue light come from the sky to the place where Mother

Mary is. One can enjoy the divine power. Only by this divine power did the ancient people (our forefathers) started building the church there. There is a great magnetic force under the Earth in that place. These are the words from Kakabujanda.

I had this experience in the last two days in my dream. I want to share my experience with you all. Again and again I want to stress, please accept that our life is a pilgrimage, it is not just about spending time in the worldly activities. You may ask what we have to do. Visit ancient palaces, ancient churches and other important places where you can find out the truth with full of evidence and you may be surprised how our ancient people find out great scientific things without the modern technology. By this I came to understand they had an excellent brain (IQ) so that whatever material they had, from that they made all the research public in order to help us.

Nowadays, we have got all the modern technology and whatnot. By this we wonder at this world, at the same time you can make your country more prosperous, more peaceful, and apart from that a more civilised nation in the world. By this we have found out so far so many improvements for the livelihood for the human beings and

also to make a more civilised country of ours. Is it not a pride for us? Be proud! and love the Nation! Do service!

I conclude this letter giving my salutation along with you all to Mother Earth. Our love, devotion to Mother Earth is never-ending. We are bound to be one, full of compassion. Mother Earth loves all her children. Dear friends, with full of love, and devotion, keep your mind, body and soul full of peace and harmony by way of planting in your garden or anywhere flowers, vegetables, and trees and safeguard them. Mother will be very much pleased by your actions and she will always give you a sweet smile and strength.

In all your thoughts and service I am always with you and within you.

Thank you
Narbhavi
