

NARBHAVI

***18th June, 2021***

Hope and blessings for all our friends. We pray to the almighty for successful stability, happiness and peace with full harmony.

Each and every soul must think about our contribution towards universal love, peace and compassion. Morality, spirituality with discipline you can find harmony.

Dear friends, enjoy nature, it's a god's gift. The great mountains, hills, valleys, big and small rivers and forests created by mother earth for the sake of humanity, enjoy peace and prosperity. Animals, birds and all creatures make us happy by their sound, beauty that makes us forget our worries and troubles. Animals are more sensible, devoted, faithful towards humanity at the same time we must protect and love them.

Love is undisturbed and makes us happy, bringing this universe together, with full of harmony.

Thanking you,  
Ramani Guruji

***18th June, 2021***

Dear Rupa and friends,

Get-together is not crowded with people, it must touch everyone's soul with love and you must enjoy the blooming of the lotus flower in their heart.

God's plan is always more beautiful than our own desire.

Take a blooming lotus flower or a rose or a sunflower, how beautiful it is, how god made it, not only with full of colours, with full of fragrance.

Relation is not collection of people but it is selection of hearts

With love we must hold them for a lifetime.

Rupa tells our friends, nature always wants to be with us but our mind goes in so many directions. Breathe and breathe in the open meadows and enjoy the strength of our life.

When we connect with divine experience, bliss, enjoyment, ecstasy and happiness become our reality. Love and compassion are most important.

Again, please inform everyone, love and compassion must be

our "LIFESTYLE"

Another important thing, I pray to God and angels to give me a boon. If I hurt others, give me strength to apologize. If people hurt me, give me strength to forgive.

## **FORGET AND FORGIVE IS THE BLESSINGS OF MOTHER MARY**

When you start walking, ice dew gives you peace and happiness, you never feel the chillness but you enjoy it, if you enjoy the chillness within you. Embrace with others full of purity, love and compassion.

Compassion is more important. You have to learn compassion from nature and with our day-to-day activities with all our friends. By way of teaching we cannot get compassion.

## ENLIGHTENMENT

Small plants, trees, meadows, waterfalls, rivers, deer and birds need our love. It is called "BANDHAM", that means our association with them in our previous incarnation.

## VERY IMPORTANT

Dear Rupa, in this modern polluted world, a lot of diseases and viruses not only kill human life, but also hurt the body and mind. How to come out, Mother Mary gives answers for us. Come to my doorstep and pray, light 5 candles, the five elements coming to your help to eradicate all the virus and health problems. Belief, faith and devotion will save all of lives. Be cheerful, don't cry, smile, the gentle breeze brings sweet news, a long Klang of peace. If you feel and enjoy the beauty of nature, there you can have the fullest compassion of earth mother.

Dear Rupa,

Go to Rhine river, sit on the banks for a moment, enjoy with cappuccino and look at the river. The water flows on the surface with strong current and force, your mind thinks the

water underneath is not so strong in force but it is very forceful. Our mind is slow but our soul works fast forever and forever.

My dear Wargalla, we must live forever and forever. I conclude this message today to our friends, be strong mentally and physically and connect yourself with mother nature.

Have a big smile while walking in the woods or meadows, chant OM OM OM.

My thoughts, my prayers always for you and I am always within you people.

Call RAMANI RAMANI I'm next to your foot.

OM SHANTHI

SANTHUSTI

Thanking you,

Guruji
