Good morning! Pleasant day for all!

The Almighty's divine rays are coming to us to give more energy, strength, and happiness for the coming days. Dear friends, be strong mentally, think positively, and everything is going to bring good, success, peace and harmony to all of you. It is a blessing from Kaka Bhunjanda, and at the same time the glorious Mother Mary, giving not only inner strength, but she will give good opportunity for peace and health.

All my prayers for you!

Thank you,
Guruji

FAITH IN GOD

I bow my head, and I surrender all my feelings to your lotus feet, O Mother Mary! Now I fully know your affection, compassion, and love for all of us. This is really a great gift to all of humanity. What a wonderful gift you have given to us: Nature (Mother Earth). Through the wonderful blue sky, the sun has started to shine, blessing all. Now this is the time, not only to relax but to realise the energy of the Sun God, air, and earth.

It was a wonderful morning, a gentle cool breeze outside welcoming us. I started for the marketplace to buy vegetables. The market place is near the church, near the old house of Balaji, and the current house of Tara. I stopped my car, and walked inside the market. The potato dealer, with full of smiles said “Good Morning!”. I really appreciated his activeness and his father used to tell me about his hard work in the field. Lots of people buy fresh vegetables, flowers etc.

The ladies getting together in the market, full of laughter and smiles, is a wonderful sight. At the time, the church bell gave a “klung”, and everyone felt it as the blessing of Mother God. When people buy vegetables and flowers with joy and smile, the vegetables and flowers feel more happy to be with the human beings. This may be my imagination, but I feel if I were a vegetable or flower, I would feel that way. That is the beauty of Nature. Now I can proudly tell you, I mix myself with Nature, and its glory. It is the greatest opportunity God has given us in this wonderful world to live a life full of love.

Dear friends, come closer and closer, full of faith, positive thinking, and with great devotion and compassion. Please, you must always think, “Today is good! Tomorrow is good! Everyday is good!”

Thank you!

Sun God gives strength, and joy

At 4 p.m. I started my regular walking in the woods and meadows. What a wonder! Suddenly, I saw a wonderful rainbow. No words could describe the beauty of the rainbow. My mind said, “Oh my dear Almighty! How did you make such a wonderful rainbow within a short period, and with wonderful colours?” The colours of the rainbow give intuitive energy and vibration to admire the beauty of not only the rainbow itself, but also to admire the gift of Nature.

Then I realise, it is not only beauty, it is the glorious act of God. I could not move further. I sat on a wooden platform and my mind started thinking of so many things. After a while, I came to the conclusion that all the actions of creators make us understand life and nature. For a moment my mind pondered how to solve or clear all our problems, and also to have good health. Then I heard a meaningful

voice from my inner self answering all these questions. It said, “Surrender yourself to the Almighty by way of doing good things for others and be with Nature, then the purpose of this life will be fulfilled. That means life is endless.” You are with Nature, and Nature is with you. Without this, there is no life.

Thank you!

Dear Friends,

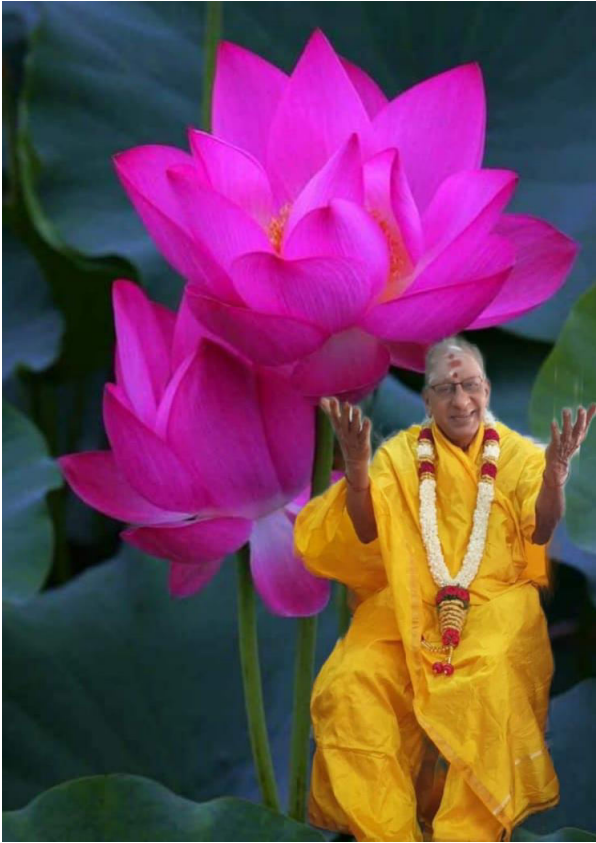

HAVE A BIG SMILE

God has given all both smiles and smell. Your nose will find out the smell and your lips deliver the smile from your inner heart. I realise the greatness of Mother Earth, how she gives different varieties of sands, muds, and gives life to plants, flowers, etc. The sand will have a taste and different kinds of elements like Nitrogen, Silicon, Oxygen, etc etc. You will be surprised how the same earth gives energy and life to plants of different varieties. Because of this we get a lot of plants with different tastes, different sweetness, and different colours. It is all for the sake of human beings and all the living creatures.

Look at the earth's sand and mud, each of them is different according to taste or strength. For all the plants that naturally grow, or those that we plant, the soil is most

important because only it enables the plants to give a different variety of colour, fruit, and other beneficial items for others. Different plants grow in different areas or latitudes. Who planned this? It is the play of the Almighty (Mother Earth). The trees or plants sacrifice their life from day one till the end, in all ways and all means. Everything is useful and nothing is wasted. You can say it sacrifices its life up to the end and beyond. It is a lesson to all of us that we must do real service to all.

I want to mention that “Service to fellow men is Service to God”. The angels brought the great blessings of Mother Mary. Really you are fortunate. You are under the protection of Mother Mary, and nature is always living with us, guiding us. Do not forget that.
